BevermannAcademy

With passion to success

"Your
company-
specific
APP"

Provided &
powered by:

BevermannAcademy™

BA

COMPANY-SPECIFIC APPS TO PROVIDE CONDENSED KEY CONTENT. EASY. EFFICIENT. EFFECTIVE.
READILY AVAILABLE ON IOS AND ANDROID SMARTPHONES: ANYTIME, ANYWHERE.

*You have
successfully
enabled (trained)
your people.*

You have provided your functions / teams with relevant training in leadership, sales, service, procurement, supply chain.

You have supplied your people with literally tons of information, documentation, that is stored on your intranet, SharePoint, the LMS or elsewhere.

*But what
happens
in situations
like...*

...one of your leaders is close to start a development review and wants to retrieve the OKR concept, that will be subject of the conversation? Accessing SharePoint and search within a 200 pages PowerPoint? Rather unlikely.

...one wants to look up a specific guideline, e.g. for a staff meeting or a negotiation talk with a customer or supplier that is due in 15 mins. Accessing LMS? Not really.

*What
if...!!*

...you provide an APP that covers any and all function-specific key content for your teams, with you in full control of content updates!

That APP will be made available through Apple App Store & Google Play Store, so that all your people (and only them) have access anytime!

*BA can make it happen w/ little effort,
including a content admin platform.*
